PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience architecting and shipping scalable SaaS platforms using Next.js and FastAPI. Delivered high-performance web applications actively serving 5,000+ users, ensuring SEO-optimized interfaces and reducing API overhead by 60%. Experienced in taking products from architecture and development to cloud deployment and scale.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Frontend: Next.js, React.js, Tailwind CSS, HTML/CSS, Redux, Zustand, Jest
Backend: FastAPI, Node.js, Express.js, Django, REST APIs, GraphQL, WebSockets, LangChain
Databases & DevOps: PostgreSQL, MongoDB, Redis, Vector Databases, Docker, AWS, CI/CD

EXPERIENCE

Full Stack Developer

Jan 2025 – Mar 2026

FRIDAYY AI

Gurugram, India

- Led the frontend architecture for a Next.js SaaS platform, enabling 100+ vendors to launch Razorpay enabled, SEO-optimized storefronts within minutes.
- Engineered a multi-tenant system with NextAuth OAuth2 flows, programmatic subdomain routing, and custom domain linking, delivering 290+ indexed pages via server-side rendering.
- Designed a system supporting 100+ concurrent product image uploads with AI-enhanced imagery and one-click marketplace export across platforms.
- Developed a RAG-powered Telegram bot in a 3-engineer team supporting 7+ languages, integrating voice-command input and agentic tool calling for real-time CRUD operations.

Software Development Engineer

Jul 2024 – Nov 2024

SHEEGHRAM AI

Bengaluru, Karnataka

- Built and launched an AI hiring platform using Next.js to automate shortlisting for 200+ candidates per job post, incorporating a real-time voice interview module using ElevenLabs achieving sub-500ms latency.
- Integrated Daily and Twilio to run 5 simultaneous live interview sessions (reducing overhead by 30%), enabling transcript analysis and rescheduling sequences to ensure 100% candidate reach.
- Created a centralized dashboard for recruiters to track applicant pipelines and evaluate interview transcripts, streamlining the recruitment workflow and reducing time-to-hire by 25%.

PROJECTS

Grainline – AI-Driven Growth Engine

thegrainline.org

- Defined the full-stack architecture for an automated apparel demand forecasting engine to predict fabric requirements, reducing overstock risk across 15,000+ active SKUs.
- Scaled real-time data ingestion pipelines that sync multi-channel sales and warehouse ERP systems, reducing inventory data latency by 40%.
- Collaborated with product designers to embed a conversational AI assistant utilizing streaming LLM interfaces, delivering interactive retail planning insights via Docker.

HIMEERA – AI Conscious Intelligence

himeera.com

- Engineered an AI companion with a streaming-optimized UI for real-time dialogue, multimodal code generation, and image synthesis, achieving sub-0.4s response latency.
- Integrated Gemini Live API and a noise suppression SDK for voice interaction across 7+ languages, implementing persistent context memory to improve response relevance by 40%.
- Architected a Progressive Web App (PWA) for cross-device accessibility and integrated Cashfree to process subscriptions with 99.9% reliability.

AWARDS & CERTIFICATIONS

- Generative AI Mastermind** | Outskill: Diffusion Models, LLM Orchestration, and RAG.
- Full-Stack MERN Development:** 4.5-month intensive program on full-stack application architecture.
- LeetCode Global Ranking:** Top 1.85% (Ranked 92,046 of 5M+) | 500+ Day Streak Badge.

EDUCATION

Chandigarh University

Bachelor of Engineering in Computer Science and Engineering

Aug 2020 – May 2024

Mohali, Punjab
